Become a Rapid Developer Exam – FAQs

How many questions & from which category/section will be there?
There are in total 50 questions, 5 for each module (Modules 1-10).

What is the exam duration & can the exam be paused and started again?
There is no specific time limit for the exam. You can take as much time as you need. Most people usually take around 1 hour to complete the exam.

What will the exam pattern be (i.e. multiple choice / descriptive)?
All of the questions are multiple choice questions. There is a part of the theory, or something that you 've encountered in one of the assignments, and you need to select the correct answer.

Is there any negative marking?
There is no negative marking. You need to achieve 75% on total, and 40% on each category.

Is only studying the "Become a Rapid Developer" online course enough for certification? Or I have to study other materials?
It is enough to follow the Become a Rapid Developer online course. Keep in mind that you also need to follow the assignments described in the learning path (build the LearnNow app) so that you gain some practical experience.

Can you please provide some sample questions to get an idea of the exam & its difficulty?
Here is a sample question:
Before you can set validation rules, you first need to create:

- Pages
- Entities
- Objects
- Microflows

You can also have a look at the knowledge checks provided at the end of each module. The level of the exam questions is slightly higher than the questions on the knowledge checks. However, if you achieve a score of 80% at the knowledge checks, that's a nice indication for the exam!
